Victor Garcia, President and Chief Executive Officer of CAI, commented, "2018 was a tremendous year for our company as we expanded each of our core businesses. For the year we reported record lease related revenue of \$320.6 million, growth of 20% over 2017, and record logistics revenue of \$111.5 million, growth of 38% compared to 2017. For the full year we reported record net income of \$73.5 million, or \$3.71 per fully diluted share, compared to net income for the year ended December 31, 2017 of \$72.1 million, or \$3.68 per fully diluted share. Excluding one-time net tax benefits, adjusted net income in 2017 was \$56.2 million, or \$2.87 per fully diluted share.

Our results for the fourth quarter remained very strong as we continued to benefit from the container investments made in the second and third quarters of the year. We reported net income for the fourth quarter of \$17.2 million, or \$0.89 per fully diluted share. The average utilization of our container fleet for the fourth quarter was 99.2% and is currently 98.8%. Despite the strong momentum, interest expense in the quarter increased by \$3.4 million compared to the third quarter, reflecting the increase in our proportion of fixed rate debt, as well as overall increases in both debt levels and interest rates.

¹ Refer to the "Reconciliation of GAAP Amounts to Non-GAAP Amounts" and "Use of Non-GAAP Financial Measures" set forth below

Mr Garcia continued, "We are optimistic regarding the prospects for our container business in 2019. We begin 2019 from a position of strength, with utilization at 99% and 92% of our on-lease owned fleet (in CEUs) on long-term committed leases. In the last two years we have leased over \$1.0 billion of new containers with an average lease term of 8.6 years. We expect our overall utilization to remain strong as we benefit from our tight contract structure and long lease commitments. Secondary prices of containers continue to be strong in most markets.

"During the fourth quarter of 2018, we sold 385 railcars for \$40 million and reported a gain of \$1.8 million. We continue to see improving utilization and rental rate trends in our rail segment. Our rail car utilization in the fourth quarter increased to 87% for all railcars as compared to 84% in the third quarter of 2018. Rental rates for most rail car types have increased by 30 to 80% as compared to the levels in 2017 and we expect this strengthening of lease rates to bring improved overall financial returns for rail car owners. Our commitment to new railcar deliveries will be complete during the first half of 2019 when we will take delivery of \$64 million of additional railcars, most of which are already on committed leases with attractive financial returns.

"We continue to be focused on growth in our logistics business, particularly as it relates to domestic intermodal and truck brokerage where we have had the most success in increasing our customer portfolio and volume. We expect continued double-digit revenue growth in our logistics business in 2019 as we continue to expand our overall operation and gain additional customers.

"We continue to manage our balance sheet to reduce interest rate risk and improve overall financial returns. During the quarter we purchased 542,000 shares of our common stock at an average price per share of \$23.83. We have approximately 2.4 million shares remaining of the 3 million share repurchase authorization we announced in the third quarter of 2018. We continue to view our shares as an attractive investment for long term shareholder value creation and expect to continue repurchasing shares in 2019. We are comfortable with our mix of fixed and floating rate debt with 62% being fixed at the end of the fourth quarter.

Mr. Garcia concluded, "2018 was a tremendous year for our company as we continued to expand our businesses and reported record financial returns. As we look into 2019, we remain confident in the financial strength of our company and will make decisions that have both immediate benefits to our results and enhance the long-term strategic development of our company."

Utilization of containers is computed by dividing the total units on lease in CEUs (cost equivalent units), by the total units in our fleet in CEUs.

The total container fleet excludes new units not yet leased and off-hire units designated for sale.

Utilization of railcars is computed by dividing the total number of railcars on lease by the total number of railcars in our fleet.

The impact on utilization of including new units not yet leased in the total railcar fleet has been included in the table above.

CEU is a ratio used to convert the actual number of containers in our fleet to a figure based on the relative purchase prices of our various equipment types to that of a standard 20 foot dry van container. For example, the CEU ratio for a standard 40 foot dry van container is 1.6, and a 40 foot high cube container is 1.7.

Use of Non-GAAP Financial Measures

This press release contains non-GAAP financial measures, and includes net income and earnings per share adjusted to reflect the impact of a non-recurring tax benefit and a non-recurring tax charge. These measures are not in accordance with, or an alternative for, generally accepted accounting principles, or GAAP, and may be different from non-GAAP financial measures used by other companies. We believe the presentation of non-GAAP financial measures provides useful information to management and investors regarding various financial and business trends relating to our financial condition and results of operations, and that when GAAP financial measures are viewed in conjunction with non-GAAP financial measures, investors are provided with a more meaningful understanding of our ongoing operating performance. Non-GAAP financial measures are not intended to be considered in isolation or as a substitute for GAAP financial measures. To the extent this release contains historical non-GAAP financial measures, we have also provided a reconciliation to the corresponding GAAP financial measures for comparative purposes.
