CAI International, Inc. Reports Results for the Third Quarter of 2020

SAN FRANCISCO--(BUSINESS WIRE)--October 29, 2020--CAI International, Inc. (“CAI” or the “Company”) (NYSE: CAI), one of the world’s leading transportation finance companies, today reported results for the third quarter of 2020.

Highlights

- Net income from continuing operations attributable to CAI common stockholders for the third quarter of 2020 was \$14.8 million, or \$0.83 per fully diluted share.
- Adjusted net income from continuing operations attributable to CAI common stockholders¹ for the third quarter of 2020 was \$18.4 million, or \$1.04 per fully diluted share.
- Container lease revenue for the third quarter of 2020 was \$73.9 million, compared to \$69.4 million in the second quarter of 2020.
- CAI’s Board of Directors declared a cash dividend of \$0.25 per common share payable on December 24, 2020 to shareholders of record as of December 9, 2020.
- Average utilization for CAI’s owned container fleet during the third quarter of 2020 was 98.4%, compared to 98.0% for the second quarter of 2020. Current utilization is 99.2%.
- During the quarter, the Company disposed of its logistics business and continues to explore opportunities to divest of its railcar leasing business.
- In September 2020, the Company issued \$742.7 million of asset-backed notes at a fixed rate averaging 2.3%. The proceeds have been used to refinance \$709.4 million of asset-backed debt with an average interest rate of 4.1%.

Additional information on CAI's results, as well as comments on market trends, is available in a presentation posted today on the "Investors" section of CAI's website, www.capps.com.

Timothy Page, Interim President and Chief Executive Officer of CAI, commented, "We are very pleased with our results during the third quarter. Adjusted net income from continuing operations attributable to CAI common stockholders was \$18.4 million an increase of 24% compared to the second quarter, as the Company benefited from very strong container demand.

"During the third quarter and continuing into the fourth quarter, global containerized trade volumes were ahead of the same period last year. Many shipping lines had significantly reduced the acquisition of new containers last year as a result of uncertainties surrounding the US/China trade disputes and then again in the first half of this year because of uncertainties as result of the global pandemic. Consequently, as trade volumes increased, many shipping lines were in the position of having to add container capacity well in excess of normal growth and fleet attrition. We expect this outsized demand for containers to continue well into next year.

"As global shipping volumes increased, we were able to quickly respond to our customers' needs for additional containers. CAI's growth in lease revenue during the quarter benefited from the lease-out of approximately \$130 million of new and sale leaseback containers. Customer demand for leasing mid-life and older containers has also been strong. We have a robust forward order book and expect to take delivery of \$110 million of new containers during the fourth quarter, with an additional \$160 million of new containers scheduled for delivery early next year; in total \$400 million of new investment since the end of the second quarter, which represents approximately 17% of our second quarter container book value. Virtually all of this new investment is supported by committed long term leases with attractive mid-teen plus returns.

"The Company continues to maintain its exceptional industry leading utilization. Average utilization in the quarter was 98.4%. Utilization was 99.1% at quarter end and is currently 99.2%. Our continuing strong performance in utilization reflects the long-term nature of our contracts, our focus on tight contract redelivery terms and ongoing fleet management; all of which underscore the long-term committed nature of our cash flow.

"Our average cash interest rate in the second quarter was 2.52%. Approximately 82% of the Company's debt is now fixed rate. During the quarter, we issued \$742.7 million of new ABS notes which carry a cash interest rate of 2.27%. These notes were primarily used to refinance \$709.4 million of higher interest rate ABS notes. As a result of this refinancing we expect our average cash interest rate across all of our debt facilities will be in the range of 2.0% in the fourth quarter. The refinancing of the ABS notes is estimated to result in a \$11.4 million reduction in cash interest expense in 2021."

Mr. Page concluded, "The revenue generated from our strong order book combined with our industry-leading utilization, a robust re-sale market and lower interest costs should all result in an expected double-digit growth in net income from continuing operations in the fourth quarter and a significant increase in ROE, setting the stage for a strong beginning to 2021."

Utilization of containers is computed by dividing the total units on lease in CEUs (cost equivalent units), by the total units in our fleet in CEUs. The total container fleet excludes new units not yet leased and off-hire units designated for sale.

Utilization of railcars is computed by dividing the total number of railcars on lease by the total number of railcars in our fleet. The impact on utilization of including new units not yet leased in the total railcar fleet has been included in the table above.

CEU is a ratio used to convert the actual number of containers in our fleet to a figure based on the relative purchase prices of our various equipment types to that of a standard 20 foot dry van container. For example, the CEU ratio for a standard 40 foot dry van container is 1.6, and a 40 foot high cube container is 1.7.

Use of Non-GAAP Financial Measures

This press release contains non-GAAP financial measures, and includes net income and earnings per share adjusted to reflect the impact of a non-recurring write-off of debt issuance costs, the impairment of rental equipment and the tax effects of such impairment. This press release also refers to return on equity, which is calculated using the non-GAAP financial measure, adjusted net income. These measures are not in accordance with, or an alternative for, generally accepted accounting principles, or GAAP, and may be different from non-GAAP financial measures used by other companies. We believe the presentation of non-GAAP financial measures provides useful information to management and investors regarding various financial and business trends relating to our financial condition and results of operations, and that when GAAP financial measures are viewed in conjunction with non-GAAP financial measures, investors are provided with a more meaningful understanding of our ongoing operating performance. Management utilizes return on equity in evaluating how much profit the Company generates on the shareholders’ equity in the Company and believes it is useful for comparing the profitability of companies in the same industry. Non-GAAP financial measures are not intended to be considered in isolation or as a substitute for GAAP financial measures. To the extent this release contains historical non-GAAP financial measures, we have also provided a reconciliation to the corresponding GAAP financial measures for comparative purposes.
